

MIDWEST RUBBER RECLAIMING DIV.
MEMORANDUM

144913

Date August 10, 1989

To Ken Hawkins

From Horace J. Drake

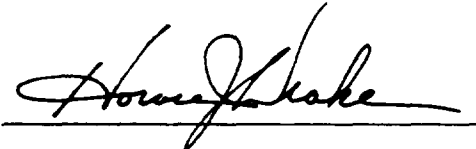

Subject ATTACHMENTS

The attached material came in by regular mail today. This matter has been brewing for years and we are already charged as PRP in two other clean ups; there are about 13 more areas in Sauget labeled as "hot spots" where we may or may not be charged as PRP.

I personally know of no hazardous waste we have sent to the two areas described but in Sauget meetings have heard both described as former landfill sites where it is said Midwest did dispose of waste and refuge. There are no records available at this plant to support that information. While I am aware of no records that reflect it I have heard that before World War II the Area 1 or Dead Creek Area received sewage from Midwest.

As difficult as it is I must admit a lack of expertise in handling this type matter and seek assistance in the preparation of any response. We are talking millions of dollars in remedial action on any of these areas. Note also response deadlines.

Please advise.
